Suffering from shock and loss of blood, he kept his nerve in a remarkable way and crawled nearly a mile to a path, where he was finally discovered, and taken to his home. The physician who closed the wound dactared it to be one of the ugliest he ever saw. It was reported here Tues day that Bernard was employed by the town of Killingly at the time of the accident, but this claim could not be rerified at the office of the selectmen, though, it was pointed out, Bernard may have been employed for the town by one of the selectmen. Doing.

Doing.

Mr. Kennedy, the Windham County Agent, is busy this week returning farm Demonstration Survey records from the town of Windham which were taken last fall by Mr. Keyes of the U. S. Dept, of Agriculture, which is working in connection with the state college at Sorrs.

These records are taken by the U. S. Dept, of Agriculture who are working with the County Agents where they are employed, and are returned to the farmers by the Courty Agent after the figures given by the farmers are worked into shape. These records consist of a complete record of one year's business on the farms surveyed cear's business on the farms surveyed by the department. The farmer gives to the man who takes the record as complete and accurate a set of figures as possible showing the amount of business he has done, size of his farm, number of cows kept, pounds of milk produced, price received for milk, and other products, etc.

These figures are gone over and the expenses are subtracted from the re-elpts leaving the gross income. From this is substracted interest at 5 per cent on the capital invested. The remainder being the labor income re-ceived by the farmer. This labor in-come is the actual cash received by the farmer for his labor and his managing ability, and does not include any part of his living which is obtained from the farm. It is simply his cash return for his time, labor and ability

When these records are taken back to the farmer, the County Agent talks them over with him and wherever possible suggests means of making the labor income larger.

The object of taking these surveys s to stimulate an interest in the keeping of cash records which will enthem to known just where they stand in their busines
